

TASK 3: NOTES

In this task, I explored coding and collaboration platforms to enhance my practical skills. I created an account on HackerRank and completed a beginner-level coding problem, which helped me understand basic problem-solving techniques. Additionally, I created a Google Form titled "Digital Literacy Awareness Quiz" with five questions and linked it to a response sheet for collecting answers. This task helped me learn how digital tools can be used for both skill development and collaboration in an academic environment.
