

Stay Safe Online – Prevention Checklist

General Digital Safety:

- Never share your UPI PIN, OTP, passwords, or bank details with anyone
- Use strong and unique passwords for all accounts
- Enable two-factor authentication (2FA) wherever possible
- Keep your phone, apps, and system software updated regularly
- Install apps only from trusted sources like Play Store/App Store
- Always log out from shared or public devices
- Use a secure internet connection; avoid public Wi-Fi for transactions
- Regularly check your bank statements and transaction history

UPI / Payment Safety:

- Never approve unknown or unexpected “collect requests”
- Remember: You do NOT need a PIN to receive money
- Double-check the receiver’s name before sending money
- Avoid scanning QR codes from unknown or untrusted sources
- Do not trust calls claiming to “help” reverse failed payments
- Use official apps like Google Pay, PhonePe, or Paytm only
- Immediately block your account if suspicious activity is noticed

Social Media & Online Behavior:

- Avoid sharing personal details like phone number, address, or ID proofs
- Do not accept friend/follow requests from unknown accounts
- Be cautious while clicking links in messages or DMs
- Do not participate in online arguments or suspicious challenges
- Verify information before sharing to avoid spreading fake news
- Maintain a professional and respectful online presence

Awareness & Smart Practices:

- Be alert to urgency tactics (e.g., “your account will be blocked”)

- Be alert to urgency tactics (e.g., “your account will be blocked”)
- Do not trust unknown callers claiming to be bank officials
- Take time to verify before making any financial decision
- Educate yourself about common cyber scams and fraud methods
- Discuss suspicious incidents with friends, family, or authorities

Reporting & Action:

- Immediately report fraud at National Cyber Crime Portal
- Call the cybercrime helpline: 1930
- Inform your bank as soon as possible in case of fraud
- Save evidence such as screenshots, messages, and transaction IDs
- Act quickly — early reporting increases chances of recovery
